

**Miscellaneous Notes from the Workshop on Process Improvement Readiness  
July 27, 2000**

**Considerations**

- Check the CMMI for items on process improvement
- Why do we treat the area of PI, not projects in general, with respect to readiness?  
Does this (like justification) extend to other areas? [Proposal: we first deal with this on PI, then consider generalizing]
- Sponsor – may be someone below senior management, likely to be convinced by other criteria than senior management
- Senior Management – those in the organization responsible for the overall business
- Next time – make the workshops review of proposed material, not generation of new material... as a way to speed up the work
